

## Accommodation

Spier, in the heart of South Africa's Cape Winelands, is more than an innovative and iconic destination. It is a place of hope that delivers experiences that rejuvenate mind, body and soul.

The fabric of Spier's rich history was created out of a journey that began in 1692 and has been embroidered for over three centuries. The original Manor House and slave bell, as well as the oldest dated wine cellar in South Africa, have been impeccably restored for future generations to stay in touch with the past.

Art, culture, wine, food, nature and conservation &ndash; these are the pillars of the Spier experiences and all are manifest on the estate, giving guests the opportunity to see, smell, hear, feel and taste for themselves the variety of unexpected encounters available at Spier.

Situated in the heart of South Africa's wine country, Spier's Wines are core to the business. Spier Wines has produced award-winning wines that have won global recognition.

At Spier, guests and visitors can experience the art of fine wine through tasting opportunities.

Spier has long believed that the arts have a crucial role to play in the African Renaissance as art, in all its forms, has the power to transform societies. As such, we launched the Spier Arts Summer Season 11 years ago as a way to express our passion for the arts.

A fine collection of African art has been deployed throughout the estate. It draws our guests into exploring the vibrancy, energy and life of the diverse heritage of the Cape and the African continent, embodying multiple cultures and traditions. Visitors can absorb the power of this collection with ease as they stroll around Spier.

Spier's promise to our audience - be they visitors, guests, wine lovers or business partners - is to deliver excellence in all our endeavours.
